ST. GERMAIN

ATOMIC ENERGY
"JAPAN AS A SYNONYM FOR
OUR SOCIETY? "

PERSONAL CHANNELING FROM 14.3.2011

ST. GERMAIN is present, we greet you.

On the occasion of this latest disaster in Japan, which leads you people to understand the impact it has when the earth is in a really serious movement, we are here today to give further information about the energy performance of Lady Gaia.

Is a synonym for what lies ahead for mankind if they will not awake!

The "game of death" - or deadly techniques - as happened in the last days of Atlantis, gives humanity, a certain "thrill" when they're in their dark aspects of certain "dark forces" which still gives them power.

This aspect, playing with the dark vibes or listening to the destroyer-energies are indeed present in every human being, but will be fatal for the planet, if humanity fails to understand this.

So has the "being Japan" made available to statue as an example for humanity.

These great souls in Japan, who are available as a "demonstration" for this purpose, in showing men kind where it can lead to when it ends in a collective inferno are blessed and highly valued on the spiritual levels. The compassion of the collective should be there for them. We ask you to notify public in "Readings. "

Japan is currently on the brink of its existence. The media report about spectacular events, but what really takes place at a deeper level, is not known and will not be announced!

The entire system of Japan, which is directly related to the Western world, is already beginning to collapse. And this - we say very clearly - will also be felt in your Western Hemisphere!

Many are still sitting comfortably in their chairs and think that this has nothing to do with them, but we tell you, beloved souls, that's not the case! Each one of you will be moved in some way from this. So can man say that the world is after the event in Japan - this "emotional Gau Japan" - not the same as before!

A few years ago your media reported - the world before "11 September 2001" was different from the world after 11 September. We can say that this incident could be called "little" or to put it in your words, was "peanuts".

What happens now is preparing for the big wave that rolls already. The "Ninth Wave of the Mayan Calendar" seeks the end point and this is seen superficially; not in spectacular events such as earth movement, but as a great awareness-jump of the collective, because the "Inferno in Japan" sets a print in every single soul on this planet.

Many memories of late-Atlantic times are awake and in the soul matrix storage a wave of energy begins to roll, that will discharge certain things.

So you could say, your entire group is currently in a real crisis situation, and thereby it will also give energy discharges to the outside. What we mean is that the collective will behave in different ways. Where it will go, can't be estimated.

It is important to understand that the beginning of the ninth wave - you can connect this name to Japan - is the "starting gun" for this last move into a new frequency. So now everything unloads, which is not in the *divine order*. This should be understood and act upon!

The politicians of all nations are called upon to take responsibility, but the group as such, should set clear standards by which the politics should perform. You should learn that not the politician is the one who has to make the decisions, but that he's ultimately only the **"hands of the people"** and has to carry out the will of the people.

This is an important finding that needs to be learned and we tell you: Your entire planet is now in great movement. Lady Gaia is in her final birth contractions that will have a significant impact on the outside.
